

2011 CIGRE Canada Conference – Halifax, Nova Scotia

Table of Contents - Papers

- 101 – Smart Grid and Super Grid with HVDC and FACTS – Technologies and Applications
- 102 - Experiences in Design, Manufacturing and Operation of UHV DC Transformers
- 103 - State of the Art GIS Switchgears and Future Trends
- 104 - Protection Requirements for a Large scale Wind Park
- 105 - Multi-Terminal Differential Relaying as a Practical Solution for Multi-Ended Line Protection for Onshore Wind Farms
- 106 - Distribution Feeder Automation using IEC61850 GOOSE Messaging over WiMAX Wireless Communications
- 107 - Wide Area Monitoring with Phasor Measurement Data
- 108 - IT and Communications Technologies for Smart Grids Field experience and Pilot Projects
- 110 - Control and Performance of a Modular Multilevel Converter System
- 111 - Kansas City Power & Light Smart Grid Demonstration Project
- 112 - HVDC Network: dc fault ride-through improvement
- 113 - IEC61850 Interoperability – User Requirements & Implementation Experiences
- 114 - Frequency Stability of Future Power Systems with High Penetration of Renewable Power and Distributed Storage Systems
- 115 - Using a Real Time Simulator to Design, Prove and Test Power System Protection Systems
- 117 – Cyber Security for Energy Automation Systems – New Challenges for Vendors
- 120 – New study on electrical and mechanical properties of high voltage polymer concrete insulators
- 121 - Offshore wind parks in the U.K.: Surpassing Expectations
- 122 - The Marine Part of the Submarine Power Cables
- 123 - Integrated Generation and Transmission Expansion Planning including Power and Fuel Transportation Constraints
- 124 - Development of a Modular Multi-Level Electro-Magnetic Transient Model of the Alstom Grid VSC (MaxSine)
- 125 - The Feasibility of Moving PMU Data in the Future Power Grid

- 126 - Power converter for grid connection of energy storage
- 127 - Engineering Method for Calculation of Short-Circuit Mechanical Effects in HV Substations with A-frame Arrangements using FEM
- 128 - Evaluation of Uncertainty of Hydrogen's Consistency in Transformer oil by Gas Chromatography
- 132 - Dimethyl Dibutoxy Silane, a Green Fluid for Underground Restoration of Medium Voltage Electrical Cables
- 133 - Renewable Energy Trade Opportunities in the United States-Mexico Cross-Border Region
- 134 - Field Validation of a Reverse Reactive Power Relay for Anti-Islanding Protection of a Synchronous Generator
- 135 - A New, Ultra-Low-Cost Power Quality and Energy Measurement Technology - The Future of Power Quality Measurement
- 136 - Optimal Generation Expansion Planning Model Utilizing Wind Power for an Indian City
- 138 - Demand Side Management & Virtual Power Plants – The Utility of the Future
- 139 - For a sustainable development of the Mediterranean Basin The MEDGRID® Industrial Initiative
- 140 - Challenges in Protection of a HVDC Converter Transformer
- 142 - Application of Intelligent Relays to Synchronous Distributed Generation Islanding Detection
- 143 - Comparison of Cable Models for the Electromagnetic Transient Analysis of HVAC Cross-Bonded Cable Systems in EMT-type Programs
- 145 - Subsea cable development for AC and DC transmission
- 147 - Mitigating Distribution Network Impacts Using Smart Grid Enabled Distributed Photovoltaic Systems
- 148 - Generator Transient Stability Control during Power System Disturbance
- 149 – Impact of Wind Power Generation on Distribution Systems
- 150 – Coordinating Generator Protection with Transmission Protection and Generator Control – NERC Standards and Pending Requirements
- 151 - Applications of Air-staged Combustion to Reduce Oxides of Nitrogen from the Large Coal-fired Power Plant in Northern Thailand Power System
- 153 - Proper detection and treatment of power swing to reduce the risk of Blackouts
- 154 - A New Composite Criterion of Inrush Current for Transformer Relay Protection
