

2014 CIGRE Canada Conference – Toronto, Ontario

Table of Contents – Papers

- 348 - Substation GPR Transfer to Feeder Neutral Points
- 349 - Application of Real-Time Dynamic Thermal Rating System on Existing Transmission Lines
- 351 - Intertie Protection of Synchronous Distributed Generation Using Intelligent Relays
- 354 - Stationery Energy Storage System Using Second Life EV Batteries
- 355 - DC-Side Fault Response of the MMC-based HVDC Link
- 360 - Voltage Sourced Converters for HVDC Overhead Line Applications
- 361 - Nelson River HVDC Gapped Arresters Replacement Study
- 362 - Energy Savings by Conservation Voltage Reduction (CVR) Technique in Commercial Buildings
- 363 - Transmission Line Parameter Estimation from Fault Recorder Data
- 365 - Prediction of Transient Stability Status using Speed Deviation and Multilayer Perceptron Neural Network
- 366 - Neural Network and Speed Deviation based Generator Out-of-Step Prediction Scheme
- 368 -Mitigation of GIC Impacts In Power Transformers and SVC Installations
- 370 - SVC PLUS: An MMC STATCOM for Network and Grid Access Applications
- 371 - Fast Message Exchange Using IEC 61850 and Direct Fiber Optic Communications within A Generation Plant
- 372 - A PSS/E-Based Power System Frequency Scan Tool
- 373 - Islanding Protection of Synchronous Distributed Generation Using Intelligent Relays
- 374 - Analysis and Validation of Interconnection Requirements of a Large Renewable Energy Installation with the Utility Grid
- 375 - The risk of flooding and the impact on the electricity infrastructure
- 377 - Risk based approach to spare parts problems with ageing infrastructure
- 380 - Estimation of Fault Resistance from Fault Recording Data

- 381 - Application of Experimentally Measured Frequency Coupling Matrices for Improved Harmonic Estimation
- 382 - A Novel Predictive Volt-VAR Optimization Engine for Smart Distribution Systems
- 383 - LED Based Fiber-Optic Voltage Sensors
- 385 - A step-wise controlled SVC for a demanding application: design and operational experiences
- 389 - Harmonic Analysis of a Transmission Connected Wind Farm utilising a long HV-AC underground cable connection
- 394 - Fault Clearing on Overhead HVDC Transmission Lines
- 396 - Realistic Assessment of Quantum and Quality of Transmission System Reactive Power Contribution from a Lightly Embedded Distribution Connected Cluster of Windfarms
- 397 - Experimental Studies and Modeling of Arc Propagation on an Ice Surface
- 401 - Amazon River Crossing and Rainforest Issues In Brazil the Tucuruí - Jurupari OHTL System - Design Optimization, Sustainability and Overall Challenges
- 402 - Field Trial of Power Electronics LV Power Regulators in a Utility Distribution System
- 403 - Calculation of Electric Field around Overhead Line Towers during Live-Line Work
- 404 - EMT Simulation of the CIGRE B4 DC Grid Test System
- 407 - System Identification Methods for Optimal Tuning of Power System Damping Controllers
- 408 - Optimal Voltage Regulation for Distribution Networks Incorporating High Penetration of PEVs
- 409 - Voltage Flicker Assessment and Planning For Large Distribution-Connected Wind Farms
- 411 - An Analysis of the Impact of Transmission Level Voltage Variation on Distribution Feeder Power Quality
- 412 - Consensus Based Approach for Precise Equal Power Sharing in DC Micro Grids
- 414 - Refurbishment and Upgrade of Highgate Back-to-Back Converter Station
- 421 - Gas Insulated Transformer Application for a Safe Underground Substation
- 423 - Dealing with Stakeholders' Expectations: A Need for Innovative Approaches
- 424 - Thyristor Voltage Regulator for Dispersed Power Sources and its Test Results

- 425 - Mackinac HVDC Converter Automatic Runback Utilizing Locally Measured Quantities
- 427 - A PMU-based Secondary Voltage Control Method
- 429 - Robotic Inspection and Intervention in Electrical Substations, System Proposal and Field Results
- 430 - Feasibility Assessment of New Generation and Load Connections
- 435 - Potential Risk of Circuit-breaker Failure upon Energization or Reclosing of Faulty EHV Lines with High Degrees of Reactive Shunt Compensation
- 436 - Mitigation for Connecting Distributed Generators beyond Power Distance Limitation
- 438 - Fine Tuning of ULTC Settings Based on Simulation Tool and Measured Data
- 440 - Economic Assessment of an Offshore HVDC Grid in North America
- 441 - Update, Upgrade or Replace your RTU? Decision Support Tool Proves the Best Value
- 443 - Wide-Area HVDC Damping Controller Design in Alberta Power Grid
- 444 - Development of 320 kV DC Compact Switchgear
- 447 - Remediation of Transient Instabilities using PMU Data for Special Protection Systems—A Case Study
- 448 - Comparison of Waveform Relaxation with Traditional Real Time Digital Simulation for Closed Loop Performance Testing of Protective Relays
- 449 - Effect of Random Delays on the Performance of Synchro Phasor based Power System Stabilizers
- 450 - Our NIMBY Experience and Response - Hydro One Environmental Assessment Process
- 451 - Computer-Aided Design of Booster Shed Parameters for Protecting Post Insulators against the Effects of Icing
- 452 - Visualizing Multiple Contingencies in Power System Operations
- 454 - Aging Infrastructure and its Sustainment Advanced Asset Analytics and Investment Planning Environment at Medicine Hat Electric
- 456 - Distributed PV Generation Modeling for Predictive Distribution Management
- 460 - Application of IEC 61850 Communication in Wide-Area Special Protection Scheme

470 - Increasing Power Line's Transmission Capacity by Quasi-Dynamic Rating

474 - PMU Data Integrity Evaluation through Analytics on a Virtual Test-Bed

475 - Large-Scale Energy Storage Deployment in Ontario Utilizing Time-of-Use and Wholesale Electricity Prices: An Economic Analysis

478 - An Innovative Solution to Electric Transmission Line Siting: The EPRI-GTC Siting Methodology

481 - Optimal Voltage Control in Distribution Network

482 - Alberta 2013 Flood Response: A Transmission Story

486 - Stochastic Program with Recourse for Electricity Markets with High Penetration of Renewables

487 - Integrated Control of Photovoltaic Inverters to Improve Distribution System Performance

490 - Transformer Reliability – A Statistical Look

491 - A Novel Isochronous Control Strategy for Coordination of Distributed Energy Resources in an Islanded Micro Grid

492 - Station Integration for Reduced Costs and Improved Operational

495 - Designing Non-Deterministic PAC Systems to Meet Deterministic Requirements

497 - Estimation of Transient Energy Terms using Machine Learning

498 - Coordinated Nonlinear Control of STATCOM-BESS and Excitation for Transient Stabilization and Voltage Regulation

499 - Harmonic Analysis Software Tool for Steady-State Analysis of Distorted Grids with Multiple Distributed Generators

500 - Real Time Modular Multi-level Converter Models for HVDC Grid Studies

503 - Smart Operation of Centralized Temperature Control System in Multi-Unit Residential Buildings

504 - Development of a Hybrid Genetic-Simplex Optimization Algorithm for Simulation-Based Optimal Design of Power Electronic Systems

511 - Multi-Level Demand Response using Grid-able Electric Vehicles

514 - Photovoltaic Model with Enhanced Computational Speed

- 522 - Utility Assessment Based on a Unified Reliability Index using Fuzzy Inference
- 527 - New Software Allows Engineers and Planners to Compare and Select the Most Efficient Overhead Conductor for their Specific Application
- 529 - R&D and Innovation Project: Using a Controlled Switching Device for a Power Transformer Application in Red Eléctrica de España
- 530 - Design, Fabrication and Erecting of the Long Span Transmission Tower for Crossing the Amazon River of 500 kV TL TUCURUÍ–XINGU–JURUPARÍ–ORIXIMINÁ Part I: Structure Analyses, Selection and Design
- 532 - Power System Small-Signal Stability: Analysis and Use of Wide-Area Monitoring Systems
- 534 - Improved Digital Image Analysis of Corroded Steel Transmission Towers
- 535 - Preparing for Distributed Generation Growth: How Utilities can benefit from a Distributed Energy Resource Management System
- 536 - Visualization of the System State in Order to Enhance Situation Awareness in Wide Area Transmission Systems for Electricity: Implementation into the Control Centre
- 541 - Taking Interoperability to the Next Level
- 542 - Extreme Weather Impacts on Transmission and Distribution Systems
- 543 - Distributed Generation Integration Challenges
- 544 - Intelligent Relay Testing Philosophy Adopted by Hydro One
- 545 - Fuzzy Multi-agent Based Voltage and Reactive (Volt/Var) Power Control in Coordination with Distributed Generators in Smart Distribution System
- 548 - Analysis of Fault Current Contributions from PV-BESS Systems
- 549 - Novel Composite Control of STATCOM for Voltage Balancing and Unbalanced Load Compensation
