

## **2017 CIGRE SC A3, B4 & D1 Colloquium – Winnipeg, Manitoba**

### **Table of Contents - Papers**

- A3-019 Switching interruption performance comparison between SF<sub>6</sub> CO<sub>2</sub> and fluoroketones-based mixtures in HVCB
- A3-024 Application of metal oxide surge arresters in parallel with circuit breaker's chambers as a possible solution to reduce TRV
- A3-025 Application research of fibre optical current transducer in UHVDC transmission projects
- A3-043 Life time management of AIS oil paper insulated instrument transformers
- A3-044 Circuit breaker requirements for out of phase switching
- A3-062 Analysis of equipment requirements to implement a 1100 kV UHV AC transmission system in Brazil
- A3-069 On-site non-intrusive testing of AC circuit breakers
- A3-070 Circuit breaker TRV mitigation measure for typical shunt current limiting air core reactors
- A3-074 Analytical and experimental study on switching phenomena and requirements of the tertiary circuit of 1000 kV transmission system
- A3-080 Alternatives to SF<sub>6</sub> for HV circuit breaker applications
- A3-081 Innovative solutions for realization of digital substations
- A3-084 Controlled switching for transmission line
- A3-106 Upgrading existing grounding system for substation expansion projects – A case study
- A3-131 Conclusions of the refurbishment of 400 kV and 220 kV disconnectors
- A3-137 Electro thermal simulations of high voltage metal oxide surge arrestors with and without installed grading rings with regard to thermal stability
- A3-147 Current transformer failures in Brazilian grid and lifetime management
- A3\_B4-009 Stress analysis of HVDC circuit breakers for defining test requirements and its implementation

A3\_B4-013 Transient current analysis of HVDC smoothing reactor base on the energy conservation principle

A3\_B4-015 A novel commutation based hybrid HVDC circuit breaker

A3\_B4-034 Short circuit calculation in AC networks in case of HVDC stations

A3\_B4 041 Hybrid DC Circuit Breakers Using Gas Discharge Tubes For High Voltage Switching

A3\_B4 105 Low Voltage Prototype Design Fabrication and Testing of Ultra Fast Disconnecter UFD for Hybrid DC CB

A3\_B4 124 DC Current Interruption Tests with HV Mechanical DC Circuit Breaker

A3\_B4 125 Mechanical Circuit Breaker Modelling for System Level Real Time Protection System Simulations

B4-007 A Probabilistic Approach for HVDC System Capital Project Prioritization

B4-020 Type Tests of Large Capacity 800KV UHVDC Valve

B4-022 Study and Design for the Nanjing UPFC Project

B4-027 Additional Functions of the Upgraded TCSR With Split Windings

B4-029 The Reliability of HVDC Systems\_Converter Transformers and Transmission Lines

B4-030 Forty Years Operational Experience and Upgrades\_Refurbishment of Square Butte HVDC System

B4-032 Comparative Analysis of DC Line Fault Recovery Technology in VSC HVDC

B4-033 Control Strategy of STATCOM for DC Transmission System

B4-035 Condition Assessment of HVDC Transformers\_A Way to Extend Expected Life Applied to the Skagerrak Transmission System

B4-036 VSC HVDC Control and Protection System for Zhoushan Five Terminal Project and Simulation

B4-037 Interharmonic Emission of Modular Multilevel Converters\_Assessment of Impacting Converter Imperfections

B4-039 Investigation of the Thyristor Failures at Lama HVDC Link and the Impact of Nearby Wind Farms

B4-040 Validation of MMC Station Real Time Models with Field Tests

B4-042 Mitigating the Interaction Between VSC-HVDC Links When One Link is Subject to a DC Line Fault

B4-047 A Review on AC and DC Protection Equipment and Technologies\_Towards Multivendor Solution

B4-048 Comparison of Mitigation Methods for Commutation Failure Reduction on the Brazilian Multi Infeed HVDC System

B4-049 Ascutney SVC Associated With Connecticut River Valley Project

B4-051 Manitoba Hydro Bipole III Transmission Project Design Aspects and Major Technical Features

B4-052 HVDC Control Replica Development for Nelson River Bipole 1 and II

B4-053 Operation Experience with STATCOM in a weak 145KV Grid

B4-054 Damping Resistor Design Consideration

B4-056 Frequency Stability in Case of Interconnectors\_AC and DC\_ and the Impact of Frequency Stabilizer

B4-057 One Side Spectral Method for Line Fault Location on HVDC Line

B4-063 Constrained POD Controller for MMC VSC

B4-064 Overvoltages Due to Pole to Ground Faults on Mixed Overhead Line Cable Transmission Systems of HVDC Symetric Monopole Configuration

B4-065 Influence of Long Dedicated Metallic Return Conductor on HVDC Converter Station Insulation Coordination

B4-066 AC and DC Harmonic Filter Design for Labrador Island Link 350KV HVDC Transmission Scheme

B4-068 Control System Upgrade of the Quebec\_New England Multiterminal HVDC Link

B4-071 Madawaska HVDC Refurbishment Upgrade of Control and Protection Functionalities Using Real Time Simulator

B4-072 Champa Kurukshetra HVDC 800KV 6000MW HVDC Parallel Bipole Transmission System\_Main Scheme Design and Operational Considerations for Different Parallel Operation Modes

B4-073 Improved Control Strategy for Commutation Failure in UHVDC Transmission with Hierarchical Connection Mode

B4-076 Design Considerations for the Extension of COBRACable Point to Point HVDC Transmission Link Into a Multi Terminal System

B4-077 Design of Belo Monte HVDC Ground Electrode for the Estreito Terminal

B4-078 Operating Experience of HVDC Links\_Behaviour during Faults and Switching Events in the Onshore Grid

B4-083 Behaviour of the HVDC Links with MMC Technology During DC Cable Faults

B4-085 Power System Studies under Consideration of the Short Circuit Power of VSC HVDC Systems

B4-088 Maritime Link Enabling High Availability with a VSC HVDC Transmission

B4-092 Reliability Enhancement of Fenno Skan Bipole

B4-093 Failures Fixes and Findings\_Year One of an HVDC Link

B4-096 Overvoltage Assessment for Insulation Coordination of HVDC Overhead Lines with MMC VSC Technology

B4-100 AC Dynamic System Equivalents for Use in Real Time Simulations of HVDCs

B4-101 Functional and Dynamic Performance Tests of MMC HVDC Projects on Real Time Digital Simulator Experiences in China

B4-109 Gamma Control Evaluation to Enhance Commutation Failure Performance

B4-111 Electro Osmosis Investigations Performed for the Manitoba Hydro Bipole III HVDC Keewatinohk Ground Electrode

B4-114 Fault Staging on a 500KV Monopole Link Utilizing an Unmanned Aerial Vehicle

B4-117 Dynamic Performance Evaluation of Static VAR Compensators with Adaptive Control and Operating Electrically Close in Real Time Digital Simulator

B4-119 Remote Community Supply Using DC Transmission

B4-128 Adjust Coordinated of the Parameters of the Controllers PSS and POD for the Devices FACTS UFPC

B4-135 Bipole II DC Switchgear for Highly Flexible Bipolar HVDC Transmission Schemes

B4-138 Air Core Dry Type Reactors for Electric Power Systems Design Considerations for High Current Connections

B4-141 Thyristors and Diodes for modern HVDC Applications

B4-145 Phasor Based HVDC Grid Modelling for Hybrid EHVAC AC\_HVDC Transmission Systems

B4-146 Specifications and Operational Experience of the New HVDC Link between Poland and Lithuania

B4-153 Study on Dynamic Performance and Coordinated Control of Multi B to B DC Links System

B4-155 A New Full Bridge Loss Optimization Modulating Strategy Based on MMC

B4-156 Enhanced Voltage Support with VSC HVDC during Unbalanced AC Faults

D1-010 PD Detection Technology Base on UHF Method in Combination with Optical Fiber Method

D1-018 The Insulation Design and Engineering Application of UHV GIL

D1-021 Simulation of Thermal Behavior of a 320KV HVDC Cable Joint With Nonlinear Resistive Field Grading Under Impulse Voltage Stress

D1-038 Integral Equation for Analysis of Partial Discharge Characteristics Based on Fluctuation of Residual Voltage and Delay Time

D1-046 Developments in Testing and Verification of GIS

D1-058 Partial Discharge Characteristics and its Degradation Process in Oil Impregnated Paper Insulation System with an Oil Gap

D1-082 Round Robin Test to the Dielectric Type Testing of a 400KV Insulator Set

D1-086 Application and Benefits of UHF On Line Partial Discharge Monitoring in GIS

D1-094 Investigating the Effectiveness of Different Test Methods Performing After Laying Tests on Long XLPE MV and HV Cables

D1-095 Health Index Methodologies for Decision Making on Asset Maintenance and Replacement

D1-097 Observation of and Response to Fast Flashover of FRP Surfaces

D1-098 Space Charge Behaviours of Insulating Papers Impregnated in Mineral Oil and Ester Liquids

D1-107 Progressive Failure of Overhead Electrical Conductors Due to Fretting Fatigue

D1-108 Comparison of Measuring Systems Used in Impulse Puncture Withstand Test

D1-110 Some Thoughts Regarding Prototype Installation Tests of Gas Insulated HVDC Systems

D1-113 Thermal Gradient Contribution to Aging Processes within Insulation  
Material\_Experimental Design and Implementation

D1-120 Electrical Effects Measurement and Monitoring of Manitoba Hydro Bipole III Project

D1-139 Application Options and Electrical Field Studies as Basis for Adequate Testing of Gas Insulated Systems for HVDC

D1-140 Behavior of Gaseous Dielectrics with Low Global Warming Potential Considering Partial Discharges and Electric Arcing

D1-142 Evaluation of Composite Insulators with Internal Deterioration\_Lessons Learned From Service and After Service Testing

D1-143 Characterization of Fillers for HVDC Field Grading Materials

D1-149 Experience from Visual Corona and Radio Interference Voltage Tests Performed on HVDC Transmission Line Hardware

D1-150 Transient Analysis of Transformer Windings Using Multiconductor Transmission Line MTL Theory and Finite Element Method FEM

D1-151 Key Properties and Performance of Silicone Coated Toughened Glass Insulators for Contaminated Environments

D1-152 Characteristics of G3 an Alternative to SF6

D1-159 Electrical Conductivity of Individual Multi Walled Carbon NanoTube MWCNT and Fibers\_Results of a Parallel Approach Combining Theoretical and Experimental Investigations

D1-160 Mechanical Behaviour of Transformer Insulation Materials

D1-161 A Design Path to Extruded XLPE Materials for 90C HVDC Applications

D1-162 Design and Testing for HVDC Converter Valves Used at High Altitude

D1-163 Influence of Extreme Temperature Conditions on the Gas Solid Insulating System under DC Voltage Stress

D1-164 DC High Voltage Test Systems with Discharging Unit for On Site
